# Intelligent, AI-Powered Dock Scheduling

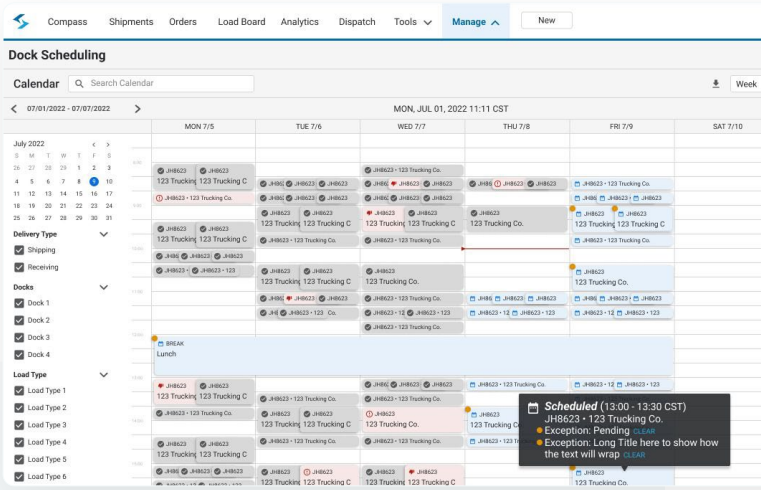

Unplanned arrivals shouldn't bring your yard to a halt. Automate scheduling, reduce detention fees, and keep freight, labor, and customer commitments flowing seamlessly.

## Increase Dock Productivity & Strengthen Carrier Relationships

Seamlessly coordinate shipping and receiving appointments through an intuitive online portal built for both carriers and dock teams. Strategic automation optimizes dock availability, adapts to your facility's constraints, and accounts for the unique requirements of every shipment—keeping operations running smoothly and relationships strong.

Intelligent scheduling that works for everyone:

- **For Shippers:** Reduce freight costs, eliminate manual scheduling, and maximize dock utilization through automation and visibility.
- **For Carriers:** Save time and reduce dwell with easy online booking and real-time appointment management.
- **For Dock Teams:** View and manage every scheduled arrival and departure in one clear, intuitive interface to keep the yard flowing efficiently.

*"Being able to look at all of our shipment modes visually in one system, connected to our production and office locations is a huge time saver."*

**Trish Triem, Transportation Manager at Graceland Fruit, on seeing an 80% increase in dock scheduling efficiency**

## Key Benefits

### Reduced Workload
Save up to 10-20 hours per day on scheduling tasks, freeing up valuable resources.

### Reduced Detention Charges
Eliminate unnecessary fees and idle time by keeping docks and carriers moving.

### Improved Carrier Compliance
Increase on-time pickups and deliveries while strengthening partnerships through predictable, transparent scheduling.

### Enhanced Visibility
Equip warehouse teams with real-time dock data and forecasted ETAs for accurate labor planning and proactive decision-making.

### Optimized Dock Management
Shrink staging areas by 20-40% with smarter dock utilization and smoother traffic flow.

### Minimized Downtime
Allocate resources efficiently and reduce equipment idle time to maximize throughput and overall performance.

## Interactive Facility Calendar

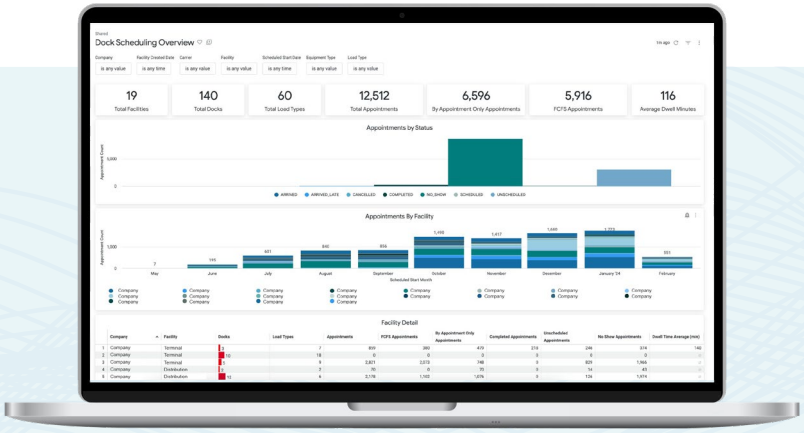

Gain real-time visibility, control, and collaboration across every dock. The interactive calendar connects carriers, suppliers, and warehouse teams on one platform–enabling instant updates, smart notifications, and streamlined communication. Easily align appointments with operational needs and adapt on the fly.

- **Carrier Portal & Mobile Access:** Empower carriers and suppliers to schedule and manage appointments anytime, anywhere–on web or mobile.
- **Customizable Rules:** Configure load types, capacity limits, and scheduling parameters to match your facility's exact requirements.
- **Integrated Data:** Sync seamlessly with the full TMS suite or external systems via modern RESTful APIs for consistent, real-time data.
- **Live Updates:** Adjust appointments instantly and track changes as they happen for faster response times.
- **Interactive Visualization:** Use color-coded dashboards and drag-and-drop functionality to simplify dock management.
- **AI Assistance:** Let the in-app AI assistant schedule shipments or purchase orders automatically–saving time and reducing errors.

## Reporting and Analytics

Inform scheduling with data that drives action:

- Consolidated analytics for complete visibility
- Interactive visualizations of key metrics
- Custom reporting for tailored insights
- Proactive monitoring to guide improvements
- Data-driven tools to optimize every appointment

## Automated Notifications & Communication

Keep everyone aligned with smart, automated alerts:

- Proactive notifications for seamless coordination
- Real-time arrival alerts for better dock readiness
- Automatic updates for schedule changes
- Integrated tracking to adjust based on live ETAs

*Mobile-native Booking Experience*
