

# Your Products Are Built with Precision. Your Supply Chain Should Be, Too.

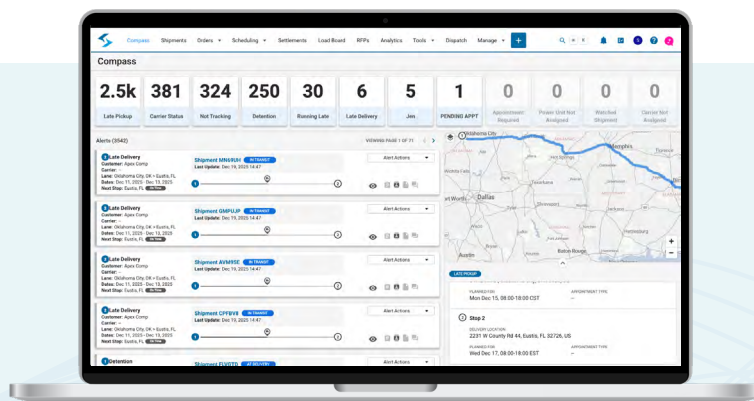

Quality control doesn't stop at the production line. Shipwell's AI-integrated TMS extends your operational rigor across every shipment. Get real-time visibility, intelligent automation, freight cost optimization, and performance analytics that protect production schedules, customer commitments, and the reputation you've built into every product.

## Manufacturing Logistics Built to Your Standards

By 2050, global manufacturing output is expected to double, pushing logistics demand to new heights as supply chains span continents and customer expectations grow. Manufacturers who hold their transportation management to the same standards as their operations will pull ahead. That's where Shipwell comes in—delivering efficiency, visibility, and intelligence to your logistics operations, all in one platform.

### Critical capabilities for manufacturing supply chains:

- Real-time visibility across all modes
- Predictive ETAs and exemption management
- Workflow automation
- Freight cost optimization
- Carrier performance scorecards
- Scalable, multi-site support

## 25%

boost in on-time delivery

## 1,000+

hours in labor reclaimed annually

## 15-30%

reduction in freight spend

*"I spent a significant portion of my day managing and paying invoices. Now, thanks to the visibility provided by Shipwell, I can access financial information in seconds. Our invoicing process is now automated, audited, and paid with minimal oversight, resulting in a major efficiency gain."*

**Philip Werkowitch**

Freight Logistics Manager

Custom Truck One Source

## Multi-Modal Visibility: One Platform, Every Mode

Manufacturing freight is complex—no two shipments are the same. Shipwell unifies truck, rail, air, and ocean tracking in a single platform, giving you flexible, convenient and error-free operations.

# Transportation Management That Delivers Results

## Gain Complete Visibility and Control

You can't manage what you can't see. Eliminate blind spots by consolidating all transportation activity into one real-time dashboard.

- Track shipments across every mode and lane
- Coordinate seamlessly between plants, warehouses, and suppliers
- Respond to disruptions before they impact production
- Give every stakeholder access to the same accurate information

## Automate Manual Work That Slows You Down

Save time, reduce costs and gain clarity with error-free automation and AI on your side.

- Shipment booking and carrier communication
- Document classification and processing
- Invoice reconciliation and exception management
- Routine coordination handled by our AI assistant

## Control Costs and Optimize Procurement

Don't leave money on the table. Minimize your freight spend with predictable spot rates, efficient RFP processes, and excellent visibility.

- Automated RFP workflows streamline bid collection and contract management
- Analytics reveal hidden costs and optimization opportunities across every lane
- Compare carrier performance and benchmark rates
- Select the optimal mode for each shipment based on cost, speed, and reliability

## Track Performance and Hold Carriers Accountable

Track what matters. With carrier scorecards and performance data, you're selecting only the best transportation partners.

- On-time delivery and tender acceptance rates
- Capacity reliability and service quality
- Performance metrics for every carrier in your network
- Data to identify top performers and address chronic issues

## Adapt Quickly and Scale Confidently

Conditions shift with seasonal demands, supply chain disruptions, and business growth. Be ready with technology that scales with you, whenever you need it.

- Automated routing and dynamic load planning
- Workflows that scale from single facilities to global networks
- Seamless integration with your ERP, WMS, and OMS systems
- Support for Infor, NetSuite, SAP and custom applications

## Implementation Without the Headaches

Get up and running quickly, without disrupting production or IT.

- Guided onboarding tailored to your workflows
- Dedicated support from logistics and manufacturing experts
- Fast time-to-value, with most teams seeing results in weeks
